PROFESSIONAL SUMMARY

Frontend Developer with 3+ years building performant, scalable web applications with React.js and Next.js. Strong in JavaScript (ES6+), TypeScript, modern state management, and component-based architecture, with a focus on performance optimization, responsive UI, and clean, maintainable code. Career changer with an MBA and a strong operations background who transitioned into software development and was recognized as Star Performer of the Year (BitCot, 2025).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Next.js, Redux Toolkit, RTK Query, React Query, React Hook Form

Styling: Tailwind CSS, SCSS/Sass, Bootstrap, Responsive Design

State & Data: Redux Toolkit, Context API, REST APIs, GraphQL (Query/Mutation), Firebase, Supabase, Socket.io

Web & Performance: HTML5, CSS3, PWA, Service Workers, Web Workers, SSR, Lazy Loading, Memoization, JWT, Webpack, Vite

Testing: Jest, React Testing Library, Postman

Tools & CI/CD: Git, Bitbucket, GitHub Actions, Bitbucket Pipelines, Jira, Confluence, Figma

Practices: Code Reviews, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Frontend) | BitCot Technology, Indore

Nov 2024 – Present

- Led development of a scalable web application in React.js/Next.js, improving page load times by ~30% through lazy loading, memoization, and code splitting.
- Increased user engagement by ~15% by delivering responsive, performant UI and refining the front-end experience.
- Partnered with backend teams to design and integrate efficient GraphQL schemas for cleaner data flow.
- Delivered multiple production features as a key frontend engineer; awarded Star Performer of the Year 2025.

React.js Developer | Sveltose Technology (Jupitech), Indore

Oct 2022 – Oct 2024

- Built and shipped UI features for the EightLive product and 6+ projects, owning component development and REST/GraphQL API integration.
- Developed strong foundations in React, Next.js, and TypeScript through PoCs and production features.
- Managed application state with Redux and Context API to improve data flow and user experience.
- Diagnosed and resolved cross-browser compatibility issues, significantly improving site stability.

PROJECTS

Evolus Admin Portal | Next.js, TypeScript, GraphQL, AWS Cognito, Bootstrap

- Enterprise admin console built with Next.js 15, React 19, and TypeScript, managing user roles, feature flags, and marketing campaigns.
- Built an AI-powered Campaign Autofill feature using Anthropic Claude SDK, reducing campaign data entry time from 30 minutes to under 5 minutes.
- Integrated AWS Cognito (Amplify SDK) for secure authentication and RBAC; used Apollo Client for GraphQL API communication with JWT-based auth cookies.

Pathfinder — College Counseling Platform | Next.js, TypeScript, Firebase, Redux Toolkit, Stream.io

- Multi-role college admissions platform with separate portals for Students, Counselors, and Admins built using Next.js (App Router), React, and TypeScript.
- Implemented real-time chat via Firebase Firestore and live video/audio consulting rooms using Stream.io SDK; built session booking with timezone conversion and token-based payments.

- Automated CI/CD pipeline with Jenkins, Docker, AWS ECR, and blue-green deployments via AWS ECS & CodeDeploy across staging and production environments.

LSR — Medical Imaging & Spinal Analysis Platform | Next.js, TypeScript, CornerstoneJS, Redux Toolkit, Firebase

- Clinical diagnostics platform for spinal analysis built with Next.js, React 18, and TypeScript; integrated CornerstoneJS v4 and dicom-parser for browser-based DICOM X-ray rendering.
- Engineered custom HTML5 canvas overlays for real-time biomechanics annotations (Cobb angles, Pelvic Tilt, FSU/Wedge angles) with coordinate transformation algorithms to preserve annotations across image resize, rotate, and zoom.
- Established secure authentication and role-based access control (RBAC) using Firebase Auth & Admin SDK with custom Next.js middleware, enforcing granular permissions for Administrators, Analysts, and Investigators.

Evolus International — User Profile & Access Management | Next.js, TypeScript, DocCheck, GraphQL

- Building profile management for multiple user types (Buyer, Non-Buyer, HCP, and Non-HCP) with distinct access levels, profile flows, and tailored landing experiences per role.
- Integrated DocCheck for secure HCP identity verification and login, enabling compliant access to restricted healthcare professional content and features.

PWA Mobile App — Capacitor.js Feasibility POC | React, Capacitor.js, PWA, iOS & Android

- Built a cross-platform PWA using Capacitor.js to evaluate feasibility of deploying a single React codebase as a native-like app on both iOS and Android for a client.
- Tested native device capabilities (camera, storage, push notifications) via Capacitor plugins and assessed PWA performance, offline support, and app store distribution viability.

EARLIER CAREER (PRE-DEVELOPMENT)

Before moving into software development, held operations, telecom, and field-engineering roles at Indian Railways (Track Maintainer, 2019–2021), AIMS Job Hub (Coordinator, 2016–2017), Vivek Engineering & Electricals (Operations In-charge, 2015), Reliance Jio (Business Operations, 2014–2015), BSNL (Apprentice Engineer, 2013–2014), and MPSEB (Line Operator, 2013) — building strong analytical, coordination, and stakeholder-management skills.

EDUCATION

MBA, Marketing Management — IMS, DAVV, Indore	2017 – 2019
B.E., Electronics & Communication — Truba College of Engineering & Technology, Indore	2009 – 2013

AWARDS & LANGUAGES

Star Performer of the Year — BitCot, Indore, 2025 · Languages: English, Hindi
